Experience the *Scandinavian*
passion

IMG is located in Sykkylven, Norway – famous for its steep mountains and deep fjords as well as the production and development centre for Scandinavian comfort recliners.

IMG's core commitment is on comfort, quality and innovative design. With generations of experience we create furniture based on the Scandinavian approach to relaxation. IMG's inspiration comes from you and what you require for ultimate relaxation. It is this foundation and focus that assures each piece of our furniture is carefully crafted to meet your needs and expectations.

Our entire range is designed, engineered and tested by our Norwegian product development team and produced in our own specialised and vertically integrated manufacturing facilities in Vietnam and Thailand.

COMFORT *NORWAY*TM

Every element of our design has been researched and engineered with a focus on both functionality and comfort all backed by a 10-year warranty. So be rest assured that you have invested in state-of-the-art Scandinavian inspired furniture that lasts.

Please visit one of our retailers and discover the true comfort and body correct support created by IMG.

*A reflective gaze, a moment of pause to appreciate
and respect nature and all her elements.*

*That is the Scandinavian way, to be in harmony with your surroundings,
to coexist responsibly with the environment and acknowledge the place and part
you play in this world.*

*At IMG, we strive to make the world a better place,
one comfortable body at a time.*

the reason why this is *Quality*

BUILT FOR COMFORT AND QUALITY

Our vision is to create and deliver products that offer an exceptional combination of comfort, quality and unsurpassed value. The human body is the pattern for every piece of our furniture. We study the human body so we can develop and deliver furniture for daily use that balances creative design with comfort, health, ergonomics and space efficiency.

The IMG Design Centre is located in Sykkylven on the northwest coast of Norway, our products are designed from the inside out by our team of Norwegian designers and engineers. Strength, durability, stability, effortless function, beauty and lasting healthy comfort are the guiding stars for all our products.

IMG has implemented a world-class quality management system that ensures all components are routinely tested to make sure they exceed the most stringent European standards.

GREEN AND DURABLE FOAM

The IMG cold cure molded foam process is unique and guarantees absolute comfort, durability and a cleaner greener product. This space age material encases the interior steel frame and sinuous springs allowing for body-friendly curvatures to be covered with glove-fitted upholstery.

ENVIRONMENT

You should also know about our commitment to the environment, and the health of our customers as well as our employees. IMG continuously works towards being as environmentally friendly and technologically practical as possible.

Out of respect for you and the environment, the best thing that we can do is to make furniture that is long lasting. To protect our environment we regularly assess the whole life-cycle of our production with focus on the type of raw material used, production processes, waste and disposal. We work diligently towards achieving reduction in the use of substances that could be harmful for the environment and the health of our employees, partners and customers.

Creating sustainable products by using eco-friendly raw materials, reducing waste factor and energy consumption in our production processes as well as extending the useful lifetime of our products and recyclability are other focal points.

CRAFTSMANSHIP

Within every chair and sofa — you will discover our passion for excellence.

We start by designing all of our seating from the inside, out. Artfully combine the science of ergonomics with old-world craftsmanship and state-of-the-art technology. This technology includes our unique mechanisms, cold-cured molded foam, lamination and distinctly designed inner steel frames.

All IMG materials are selected to ensure optimum performance. Each material has been individually assessed to provide the correct style and comfort for each model. Our skilled team use specialized equipment in combination with years of experience to secure the best outcome.

We show great respect for good craftsmanship and leave our mark on every single piece of furniture – of the person who last handled it. This mark is the fingerprint of a proud producer and is also your guarantee that the furniture from IMG is built to last.

COLD-CURED FOAM CUSHIONING

THIS SPACE-AGE MATERIAL ENCASES THE INTERIOR STEEL FRAME AND SINUOUS SPRINGS, ALLOWING FOR BODY-FRIENDLY CURVATURES TO BE COVERED WITH GLOVE-FITTED UPHOLSTERY.

- A** A soft polyurethane foam and fiberfill layer ensures extra softness whilst accentuating the chair's elegant design contours.
- B** Top grain leathers in four grades and a wide variety of fabrics provide a luxurious look and long wearing performance.
- C** Computer controlled injection molded cold cured foam ensures ergonomically correct seating posture and enhanced support throughout all areas of the chair.
- D** Sinuous springs located throughout the back and seat area provide optimum support while cradling the body.
- E** An adjustable knob underneath the seat controls the tension on the reclining mechanism.
- F** A tubular steel frame along with a 2"/5.1 cm wide steel strap that spans the front provides optimum strength and stability.
- G** Two steel plates attach the European-produced centre post swivel to both sides of the wood base for effortless movement and unsurpassed stability.
- H** Ultra-sonic wood lamination allows for graceful chair designs with exceptional strength in conjunction with a 10-gauge steel undercarriage.
- I** The patented Comfort-Glide™ low-friction reclining mechanism easily and automatically adjusts in response to body weight and movement.

Disclaimer: Due to the handmade nature of this product, all measurements are approximate and can vary in size on any individual product up to 2 cm.

DESIGNED IN NORWAY

Leather & wood

Leather is a natural product and every hide has its own unique characteristics. Colour and grain variations are normal and can vary from hide to hide. Common surface variations include scratches, wrinkles and healed scars. Colour change will occur with time, due to use and the effect of light.

PRIME

PRIME is a top grain aniline-dyed and pigmented upholstery leather with a thickness between 0,9-1,1 mm. It has been slightly corrected.

TREND

TREND is a premium top grain aniline-dyed upholstery leather with a rich and comfortable feel.

ELITE

ELITE is a thick corrected grain leather featuring a pigmented pebbled appearance supported by a protective lacquer that assists cleaning.

SAUVAGE

SAUVAGE is a natural milled top grain, upholstery leather made from the best rawhide selection.

WOOD COLOURS

A number of products with visible wood can be delivered in a wide range of colours.

* Printed colors in this catalogue may appear different from the actual cover colors.
** Cover will be discontinued from time to time.

Leather

Linea is a premium top grain aniline-dyed upholstered leather with a rich comfortable feel supported by an extensive colour palette. The advanced upholstery protection of Linea retains the natural characteristics of quality leather. Linea has a subtle fine grain with a thickness of 0.8 - 1.0mm which is ideal for upholstery applications. Its soft waxy feel coupled with a semi-matt appearance adds to its luxurious personality.

- The Mastrotto Linea range is available on all IMG designs.
- Allow an additional 2 weeks for completion.

LINEA

* Printed colors in this catalogue may appear different from the actual cover colors.
** Cover will be discontinued from time to time.

* Printed colors in this catalogue may appear different from the actual cover colors.
** Cover will be discontinued from time to time.

Textile

IMG offers a wide range of fabric types selected to suit many homes and lifestyles. Ultra Smart fabric is another alternative that is durable and stain resistant. Please ask your retailer for more information.

HABITAT

COMPOSITION: 100% POLYESTER | MARTINDALE: >30000 | PILLING: 4-5 | COLOUR FASTNESS TO LIGHT: 5
